Quick Setup Guide

1D plug and play barcode scanner/35 keyboard language by default. If you use other type of physical keyboard, plug/USB add on your device, setup keyboard language then you can start to use it. If you want to do other configurations please refer to below programming barcodes.

Barcode Programming

Netum barcode scanners are factory programmed for the most common terminal and communications settings. If you need to change these configurations, programming is accomplished by scanning the bar code in this guide. An asterisk (*) next to an option indicates the default configuration.

Keyboard Language

In order to let scanner upload the codes in a correct way, you have to set the keyboard language before you use the scanner.

Two example

- If you use French keyboard, scan common barcode of "French keyboard" then scanner will upload barcodes according to French keyboard layout. American keyboard is configured by default, if you use a US keyboard you can skip this step.
- For example

   Keyboard language before you use the scanner.
   - The default language is English. Please refer to “USB Country Keyboard Types” to change
   - Disable MSI
   - Enable RSS Limited
   - Enable Code32
   - Disable Plessey
   - Enable RSS Omnidirectional
   - Disable RSS Omnidirectional*

Problem: Carriage Return/Line Feed settings.

Solution: Please refer to the part of "Terminator configuration".

A. Dirty or unclear barcodes might not be read.
   - Solution: Clean scanner window.

B. The possible reason is that setting for some barcode types are not commonly used is off by default.
   - If you need to activate a specific barcode type to get it to work. Please contact the supplier that you've purchased it from or you may go to our official website www.gzxlscan.com to download the complete manual and refer to the "Port settings" and "Interface type" to adjust the settings for the help.
   - Question: How to solve the messy code problem encountered while using other foreign language?
   - Solution: Please refer to the part of "Prefix and suffix".

Problem: Some barcodes cannot be read.

Solution: Please refer to the part of "Terminology configuration".

Problem: Interleaved 2 of 5 barcode scanner cannot be read.

Solution: Make sure you have selected the scanning mode Continuous or Manual Trigger.

Problem: Barcodes that you have scanned are not being read. Please refer to the part of "Prefix and suffix".

Problem: Touch scanner won’t be read.

Solution: Make sure you have selected the scanning mode Continuous or Manual Trigger.

Problem: No barcodes are being read. Please refer to the part of "Prefix and suffix".

Problem: Booth barcodes cannot be read.

Solution: Make sure you have selected the scanning mode Continuous or Manual Trigger.

Problem: Barcodes that you have scanned are not being read. Please refer to the part of "Terminology configuration".
