### Bluetooth Barcode Scanner Overview

Netum bluetooth model integrates a high-performance processor with an effective decoding board, combining a fast decoding speed, high precision and a high anti-interference ability in one device. The device can easily read barcodes on paper and other surfaces.

### 1. Operation mode

**A) Basic Mode (HID) (Default)**

No software installation needed, connects to most devices. In this mode, the scanner interacts with the device like a keyboard. Therefore, the scanner will work with Safari, Notes, and any other applications that supports an active cursor.

**B) Application Mode (SPP)**

Software installation is required. If you have an application that supports mobile scanners this is the mode recommended.

### 1-1) By scanning the following barcode, the store mode will be activated.

**Store Mode**

1. Power on the scanner. Make sure the scanner is discoverable (unpaired).
2. Use your computer’s Bluetooth Settings to connect to the scanner.
3. In the device list, select “Netum Bluetooth”. Click Next.
4. If a passkey is requested, enter 0000 (four zeroes). Click OK. Or Pair Now.
5. The scanner will connect to the Apple device.

**B) Application Mode (SPP)**

For Android or Windows only

Software installation is required. If you have an application that supports mobile scanners this is the mode recommended.

### 1-2) By scanning the following barcode, all data in the buffer memory will be deleted (only in store mode).

**Clear All Data**

- Pressing the trigger button will initiate the attempts to connect.
- Make sure the device is in range with Bluetooth turned on.
- If a connection is not made after several attempts, the scanner will emit a long beep (and the scanner will beep once after it has connected and is ready to scan).
- If a connection is made, the blue light will stop blinking and turn solid.

### 1-3) By scanning the following barcode, all data entries in the buffer memory can be manually uploaded after reconnecting to the working station (only in store mode).

**Manual Data Upload**

- Summarising of uploaded data entry quantity

### 1-4) By scanning the following barcode, the gross quantity of the uploaded data entries will be summarised (only in store mode).

**Summary of uploaded data entry quantity**

### 2) Normal Mode

By scanning the following barcode, the device leaves the store mode, normal mode will be reinitialised.

### 3) Keyboard Language Setting

- Select your keyboard language
- Scan the relevant keyboard codes
- Then you can change your language as selected.

#### Windows: Connect Windows PC (HID)

1. Power on the scanner. Make sure the scanner is discoverable (unpaired).
2. Use your computer’s Bluetooth Settings to connect to the scanner.
3. In the device list, select “Netum Bluetooth”. Click Next.
4. If a passkey is requested, enter 0000 (four zeroes). Click OK. Or Pair Now.
5. Follow the remaining screens to complete the wizard.

#### Note:

- To switch from one mode to the other you must remove the pairing information from both devices-host device and the scanner.

#### Automatic Reconnections

Each time you power on the scanner, it will automatically try to connect to the last device it was connected to.

- Make sure the device is in range with Bluetooth turned on.
- Pressing the trigger button will initiate the attempts to connect.
- If using Application Mode, make sure the Scanner-enabled Application is launched or running.
- If a connection is made, the blue light will stop blinking and turn solid.
- If a connection is not made after several attempts, the scanner will emit a long beep (and the blue light will turn off).
- Press the trigger button to re-initiate the connection process.

### 3. Keyboard Language Setting

- Select your keyboard language
- Scan the relevant keyboard codes
- Then you can change your language as selected.
